

# SCHOOL LOAN PROGRAM

The School Loan Program has kits of educational material on subjects from Archaeology to Zoology. These kits are intended to foster curiosity and understanding among all ages by providing tangible materials such as specimens, replicas, models and devices for experiments. Every kit includes printed background information.

Kits are available to teachers, home schools, group counselors, etc. Functioning like a library, school loan users can check out two kits at a time for a two-week period. Please allow 48 hours for processing your request.
